

Mail Tracking for Your Campaigns

Be prepared for new calls and online leads by knowing exactly when your mailing campaign is hitting mailboxes.

Mail Tracking Features:

- Track mail right down the individual addressee/individual
- Fully integrated with informed visibility and displayed graphically with Google Maps
- Exportable reporting by city, state and zip code
- Want to know if a certain individual received their direct mail piece? Search by name!
- Retrieve a full report of non-scans
- Offers secure, white label end-user access to essential postal delivery data

The key benefit is you will now be able to use one service for both tracking and marketing for your clients and that will save you \$\$.
